ARTICLE'S TITLE

The authors mentioned below declare having clear knowledge about the contents exposed in the document submitted to consideration and approve its publication. As the authors of this manuscript, we certify that no material contained in it is included in any other manuscript, and it's no being taken into consideration for other publication; has not been accepted for publishing, nor has been published in another language. Moreover we certify that we have contributed with the scientific and intellectual material, data analysis and manuscript writing, making us responsible of its content. We have not given any right or interest from the work to third parties. By the same token, we certify that all the figures and illustrations that accompany the current article have not been modified digitally and represent accurately the facts informed.

The signing author below declare not having commercial association that may generate conflict of interest in relation to the manuscript, with exception of what is declared explicitly in a separate page (equitable property, patents, license agreements, institutional or corporative associations).

The funding sources from the work presented in this article are indicated in the cover of the manuscript. We leave evidence of having obtained informed consent from the patients subjected to investigation in human beings, in agreement with the ethical principles contained in the Helsinki Statement, as well as having received endorsement for the investigation protocol from the Institutional Ethics Committees where they exist.

The signing authors below transfer by means of this document all rights, title and interests from the present work, as well as the copyright in every way and means known and to be known, to the journal **MedUNAB**. In case of the article not being published, the journal **MedUNAB** agrees to take back the rights stated to their authors.

All authors must sign this document. Computerized or stamp signatures are not valid.
